

Quantum Theology: Spirituality and the New Physics

Science and Religion Series

Six **Monday Evenings** in May and June of 2010,
at 7:30-9:00pm.

May 3	Chapters 1-4	Pages 1-57
10	Chapters 5-7	59-97
17	Chapters 8-9	101-127
24	Chapters 10-11	131-159
June 7	Chapters 12-13	163-184
14	Chapters 14-15	189-207

Postulating a new theology is by any standard no mean feat. Here, Fr. Diarmuid O'Murchu M.C.S., valiantly does just that, articulating a theology that embraces the latest advances in quantum physics in a clear and readable manner. Beginning each topic with a well-researched presentation of modern quantum physics from a scientific point of view, Fr. O'Murchu then address the religious and spiritual significance of physics for conceptualizing and articulating a contemporary theology. In the end, this book successfully presents a cosmic theology which is recognized as an important voice in the dialogue between science and religion, as well as the interface between physics and spirituality.

Location: Henry Hood Center for Health Research, Intermediate Conference Room #4

Instructor: Chaplain Karl A. Pölm-Faudré, PhD
Director of Education, Research and Outreach, Division of Spiritual Care,
Geisinger Medical Center, Danville, PA 17822

Text: O'Murchu, Diarmuid (2004). *Quantum theology: Spiritual implications of the new physics*, Revised & Updated Edition.
NY: Crossroads Publishing Company. ISBN 0-8245-2263-X
Participants are responsible for purchasing their own text in advance.

Registration: General open registration – come when and as you can. No fee.
Those participating for continuing education hours will register the first night
and their attendance will be recorded for a certificate upon completion.
